

# eCard Composer - Involve Your Audience

Sun Microsystems' Swing Team chose eCard Composer to promote the Java mascot 'Duke' on the Java One Conference 2006 in San Francisco, CA. Conference visitors had the opportunity to create animated 'Duke-A-Grams' and then e-mail them to friends or submit them for inclusion in 'Duke's Zone' on the java.com website.

The software is built on the same codebase as FluxTime Studio, and benefits from extensive testing and two years experience in a production environment.

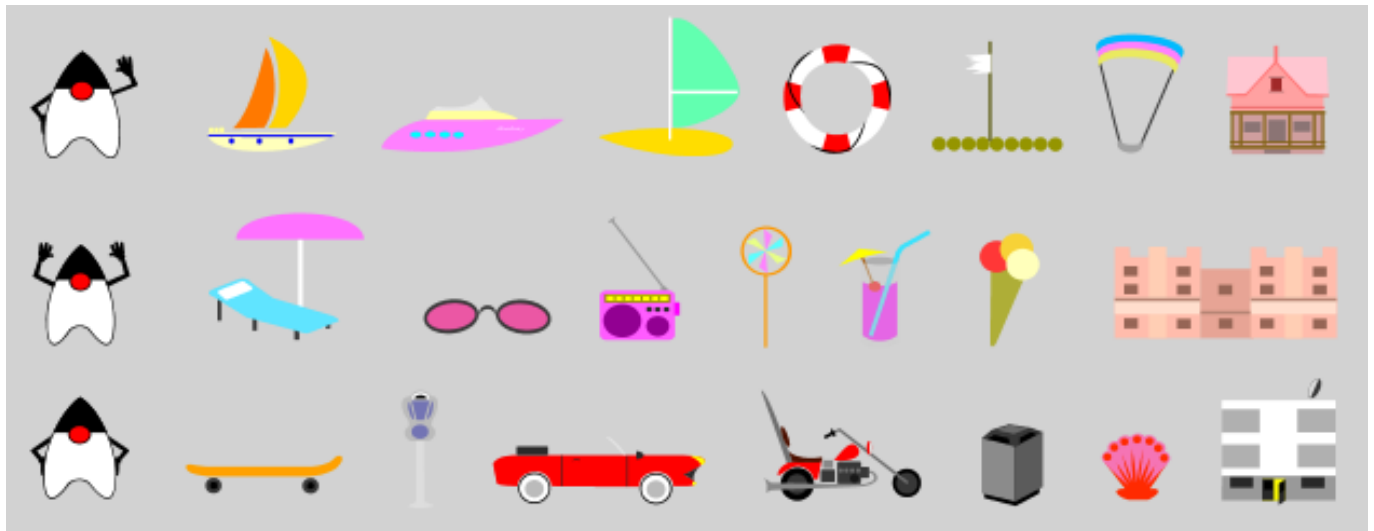

Targeted at the casual user with no time to read tutorials or help files, eCard Composer only offers the most basic tools:

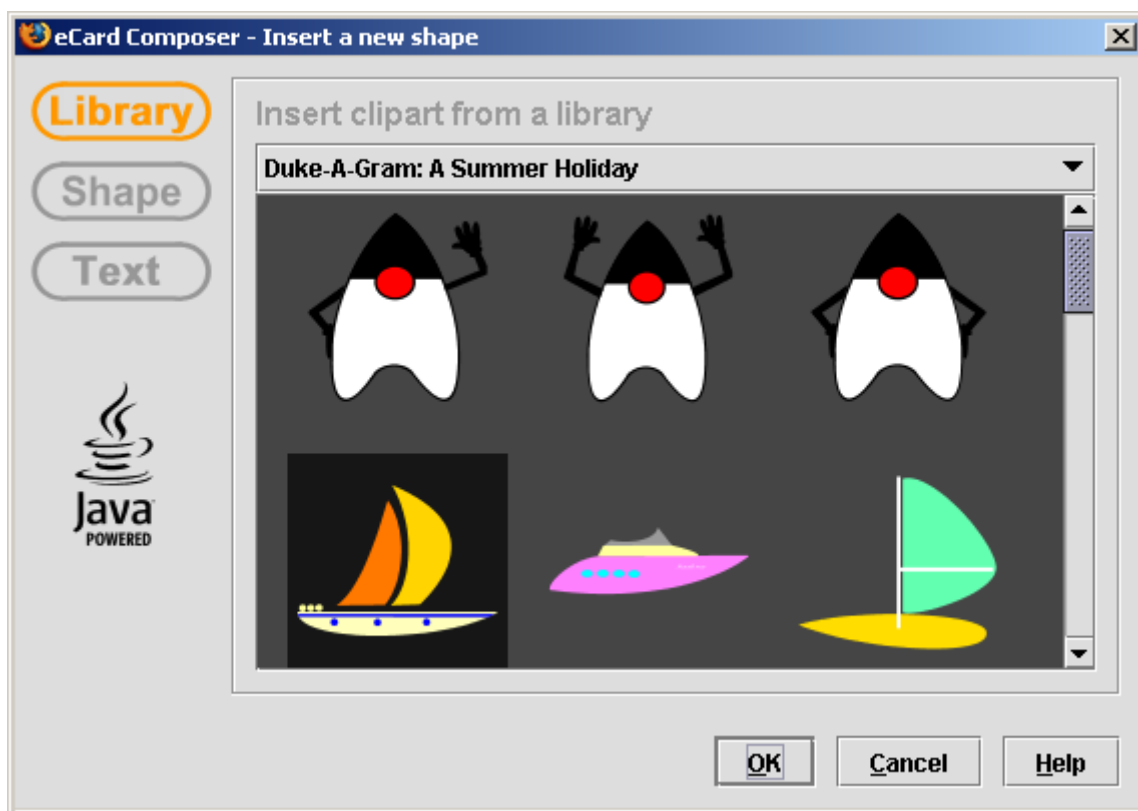

# eCard Composer - Involve Your Audience

Duke-A-Gram - Sun Microsystems - Java One Conference 2006

eCard Composer can be customised and branded for a specific product or campaign. Themed clipart libraries can be plugged in on the fly. The example below shows the 'Duke-A-Gram: A Summer Holiday' clipart library, including 'Duke' the Java mascot.

A company or product logo can be displayed during start-up, and in the side-bar of dialog windows. Note the 'Java Powered' logo in the screenshot below.
